

Industrial iPhone Tethering SOLUTIONS

iPhone - Safety Tether Vest Pocket Mount *Use for Talking, Texting, and Apps*

Usage: iPhone used for Talking, Texting, and Apps (Not recommended for scanning operations)

Micro Gear Keeper is located at the bottom of the upper vest pocket with either stud mount system into existing vest or integrated into Radians Vest Integration System.

Safety Tether: Prevents loss and damage without inhibiting iPhone use. iPhone is typically stored in pocket when not in use.

■ **Threaded Stud Mount**
Available Retraction Force:
2.5 oz./26"

iPhone - Integrated Vest Tether *Use for Industrial Functions*

Usage: iPhone used for Industrial Functions (Including Scanning)

Gear Keeper is located at the bottom of the lower vest pocket with either Stud Mount in existing vest or integrated into Radians Vest Integration System.

Safety Tether Option: Recommend 6oz retraction force prevents loss and damage with minimal force on iPhone. Will not retract the iPhone, but typically the iPhone can be returned to pocket area and released to be left dangling for frequent use. Store iPhone in pocket when not using.

Retractor Option: Recommend 9oz or 12oz retraction force depending on iPhone model and case configuration.

With correctly selected retraction force, iPhone can be let go and will retract back to pocket area. Can be left hanging during frequent use. Store iPhone in pocket when not using.

■ **Threaded Stud Mount**
Available Retraction Forces:
3 oz./36"
6 oz./36"
9 oz./32"
12 oz./27"

iPhone - Retractable Tether *Use for Industrial Functions*

■ Snap Clip Mount

Available Retraction Forces:
6 oz./36"
9 oz./32"
12 oz./27"
16 oz./22"

■ Carabiner Mount

Available Retraction Forces:
6 oz./36"
9 oz./32"
12 oz./27"
16 oz./22"

■ Alligator Clip

Available Retraction Forces:
6 oz./36"
9 oz./32"
12 oz./27"
16 oz./22"

■ Standard Belt (2")

Available Retraction Forces:
6 oz./36"
9 oz./32"
12 oz./27"
16 oz./22"

Usage: iPhone used for Industrial Functions - (Including Scanning)

Gear Keeper is Attached to Person

- Snap clip to belt loop or D-ring
- Carabiner to belt loop or D-ring
- Alligator Clip to Clothing (i.e. vest pocket flap, scrubs)
- Rotating Belt Clip to pants or belt

Safety Tether Option: Recommend 6oz. Retraction Force prevents loss and damage with minimal force on iPhone. Will not retract the iPhone, but typically the iPhone can be returned to mounted area and released to be left dangling for frequent use. Store iPhone in pocket when not using.

Retractor Option: Recommend 9oz. or 12oz. retraction force depending on iPhone model and case configuration.

With correctly selected retraction force, iPhone can be let go and will retract back to the mounting area and is suspended by Gear Keeper.

iPhone can be stored in a pocket when not in use to avoid dangling.

QC Male Connections

- **7/8" Split Ring.** Attaches to iPhone case strap or if case has large lanyard loop attachment points.
Recommended for UAG cases

- **Spectra/Nylon Lanyard.** Attaches to iPhone case with large lanyard loop. Use this lanyard when it will fit as it is the strongest lanyard attachment.
Recommended for PIVOT cases.

- **Thin Nylon Cord Lanyard – Short.** Attaches to iPhone case with small lanyard loop attachment points.
Recommended for Otter Defender cases

- **Thin Nylon Cord Lanyard – Long.** Use on any case when extra length lanyard is desired.
Recommended when storing iPhone in separate pouch.

- **Adhesive Pad Eye w/ Spectra/Nylon Lanyard.** Attaches to back of most cases or directly to iPhone. Used when no lanyard loop exists on the case.
Recommended for Otter FRE iPhone Case

QC Reduced Strength Connections *Use for Safety When Concern of iPhone Getting Caught in Machinery*
