

Fly Fishing

Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in severe environments with maximum break strength and durability.

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The RT3 series features **80# break-strength** with Spectra/Nylon line. The RT4 series features **60# break-strength** with Spectra/Nylon Line. The RT5 Micro Series features **40# break-strength** with a spectra/nylon line. All three series Gear Keepers have high-impact housings and are available in multiple spring forces and mounting options for securing the gear you need to keep handy and can't afford to lose.

The **High Force Locking Net Retractor** has revolutionized the holding, securing, and use of a landing net. It's perfect combination of force and extension allows full landing net use without restriction. Use your net, then let it go; it stores itself on your back. No more worrying about losing your net or fumbling to re-attach a magnet. And the handy **Locking Mechanism** secures your net while hiking through brush.

The **Wading Staff Tether** is the best way to secure a wading staff at your side so it's accessible but isn't getting tangled around your legs. Use your wading staff, then let it go; it'll be right there when you need it. The **New RT4 Series Wading Staff Tether** makes a great product even better! It offers longer extension for cross-body reach and now comes as a **Combo Mount**—both a **Snap Clip** and **Threaded Stud** in the same package! That's even more flexibility for mounting your Gear Keeper right where you want it.

The **New RT5 Micro** series Gear Keeper is the perfect **Zinger** solution — small/light package, strong 40# break-strength, long 36" extension, 2-oz. retraction force that handles both your nippers and forceps.

Additionally it includes all of the standard Gear Keeper features; patented flushing system, saltwater proof, and Q/C end type.

Patented Flushing System
Salt Water Proof

Heavy Duty Snap Clip
Easy, flexible attachment to loops or D-rings

Engineered application-specific Force options

High-Impact Case

Locking Mechanism
Tether can be locked while walking through brush

Q/CII Connector

"Provide quality products, competitively priced and delivered on time with total customer satisfaction.

A simple promise in a complex world."

Gear Keeper Retractors are built by Hammerhead Industries, Inc., the world's leading manufacturer of personal tethering equipment including retracting lanyards for tools, gear and instruments. Covered by numerous patents, Gear Keeper products are precision-made systems that keep gear and instruments safe, secure and close at hand.

There is nothing random about our Quality. Our Guarantee.

All of the company's products are built "Hammerhead Tough" in the USA. Hammerhead Industries warranties its products against manufacturing defects in workmanship and materials. If you are not satisfied with the quality or performance of any Hammerhead product, we will replace it or refund your money within 30 days after purchase through your original dealer or retailer. The warranty is void if the product has been abused beyond normal wear and tear or used for purposes other than intended.
