

“Provide quality products, competitively priced and delivered on time with total customer satisfaction. A simple promise in a complex world.”

Gear Keeper Retractors are built by Hammerhead Industries, Inc., the world’s leading manufacturer of personal tethering equipment including retracting lanyards for tools, gear and instruments. Covered by numerous patents, Gear Keeper products are precision-made systems that keep gear and instruments safe, secure and close at hand.

There is nothing random about our Quality. Our Guarantee.

All of the company’s products are built “Hammerhead Tough” in the USA. Hammerhead Industries warrants its products against manufacturing defects in workmanship and materials. If you are not satisfied with the quality or performance of any Hammerhead product, we will replace it or refund your money within 30 days after purchase through your original dealer or retailer. The warranty is void if the product has been abused beyond normal wear and tear or used for purposes other than intended.

To find a dealer near you or for more information about any Gear Keeper products, contact Customer Service.

Fly Fishing

Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in severe environments with maximum break strength and durability.

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a patented flushing system that clears sand and debris from the unit, is salt-water proof, and a patented Q/C Connector System that provides quick and easy connection/disconnection of gear.

The RT3 series features 80# break-strength with Nylon/Kevlar line. The RT2 series and the New RT4 series features 60# break-strength with stainless steel nylon coated cable. The New RT5 Micro Series features 40# break-strength with a spectra/nylon line. All four series Gear Keepers have high-impact housings and are available in multiple spring forces and mounting options for securing the gear you need to keep handy and can't afford to lose.

The High Force Locking Net Retractor has revolutionized the holding, securing, and use of a landing net. It's perfect combination of force and extension allows full landing net use without restriction. Use your net, then let it go; it stores itself on your back. No more worrying about losing your net or fumbling to re-attach a magnet. And the handy Locking Mechanism secures your net while hiking through brush.

The Wading Staff Tether is the best way to secure a wading staff at your side so it's accessible but isn't getting tangled around your legs. Use your wading staff, then let it go; it'll be right there when you need it. The New RT4 Series Wading Staff Tether makes a great product even better! It offers longer extension for cross-body reach and now comes as a Combo Mount—both a Snap Clip and Threaded Stud in the same package! That's even more flexibility for mounting your Gear Keeper right where you want it.

The New RT5 Micro series Gear Keeper is the perfect Zinger solution — small/light package, strong 40# break-strength, long 36" extension, 2-oz. retraction force that handles both your nippers and forceps.

Additionally it includes all of the standard Gear Keeper features; patented flushing system, saltwater proof, and Q/C end type.

■ Snap Clip Mount

Also available in:
Threaded Stud Mount
Bracket Mount
Velcro Strap Mount

■ High-Impact Case

■ Patented Flushing System
Salt Water Proof
