# Kayak Fishing

## Retractable Gear Attachment Systems

Stay organized and tangle-free with **Gear Keeper Yak Tethers** made for kayak anglers to keep their gear where they want it, when they want it. Needless to say, kayak fishing takes place in a less than stable environment. Tipping can result in a complete loss of gear. Add to that the fact that you are operating in a highly-confined space, and organization and safety of gear become two of your top priorities. Use **Gear Keeper Yak Tethers** to paddle confidently into some serious fishing action without worrying about losing your paddle, net, pliers, rod or cell phone and knowing you'll be able to access them when you need them.

The custom-built retractable gear attachment system has been designed to work hard and protect gear in severe environments with maximum break strength and season-after-season durability. A patented flushing system clears sand and debris from the unit, is salt-water proof, and is equipped with a patented Q/C Connector System that provides quick and easy connection/disconnection of gear.

Secure your **net or gaff** to your kayak with the **Locking Net/Gaff Retractor**. Allowing for 57" total reach extension and a high retraction force (12oz.), feel confident that you'll not only be able to use your net when you need it, it'll retract back for safekeeping. Avoid jumping overboard after your paddle with the **Yak Tether** and **Elastic Rod/Paddle Leash**. Built with both high strength and high stretch, the paddle leash is long (67" extended, 35" retracted) with low force which allows for hassle-free use while safely connected to your kayak. Confidently use those quality pliers knowing the **Pliers Safety Tether** will securely and safely tether them to your person. A low retraction force makes storing pliers in your pocket or boat bottom ideal. Employ the **Locking Rod Leash Retractor** to secure your rod while kayak fishing. The unit minimizes entanglement, while a low 6oz. retraction force provides a safety tether without hindering full mobility and rod use while fishing or fighting a fish.
