## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in severe environments with maximum break strength and durability.

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a patented flushing system that clears sand and debris from the unit, is salt-water proof, and will withstand high-temperature environments; a patented Q/C Connector System that provides quick and easy connection/disconnection of gear.

The RT3 series features 80# break-strength and Spectra/Nylon line. The RT2 & RT4 series features 60# break-strength, either Stainless S steel nylon-coated cable or Spectra/Nylon line, and a high-impact housing.

Gear Keeper’s patented 360-degree Rotating Belt Clip allows the retractor to rotate during use, reducing tension and line wear.

The Stainless Steel belt clip is built tough to survive severe and moist environments. In addition, the exclusive interlock feature prevents the Gear Keeper from becoming dislodged.

Combined, all these features make this one tough retractor.

The Standard Belt Clip fits belts up to 2". The Extended Belt Clip model fits Duty belts up to 2¼".

The RT3 series is also available with a Clamp-on Belt Clip (fits up to 2¼" belts) for high security, i.e. prison guards.

Law Enforcement Gear Keeper packages target applications ranging from Lapel Mic Keepers, Side Arm Tethers and specialized Key holder applications.
